## **SLVWD Water Quality Report Available On-line**

The 2013 Drinking Water Consumer Confidence Report is now available online at <http://slvwd.com/ccr/SLVWD-CCR2014.pdf>

In order to save printing costs and natural resources, the San Lorenzo Valley Water District is distributing its 2013 Drinking Water Quality Report electronically rather than sending a hard copy to each account holder.

This report contains important information about the drinking water served by the San Lorenzo Valley Water District. The report has been posted in the “What’s New” section on the homepage of its website at [slvwd.com](http://slvwd.com). Customers will receive information in a helpful insert with their June bill. The reverse side of the bill insert includes a list of water conservation tips, to help customers conserve water in this drought year.

According to the 2013 report, SLV Water District met all state and federal standards for contaminants. Additional report sections describe where the district’s water comes from, the importance of protecting those sources, and specific water quality concerns some customers may have.

Printed reports are available at the San Lorenzo Valley Water District administrative office, 13060 Highway 9, Boulder Creek, and will be mailed on request by calling 831-338-2153.
